Oneiber Quintero

Computer Engineer

WORK EXPERIENCE

Full-stack Developer

Fronve | october 2024 - october 2024

location: Venezuela Táchira

- I updated the Angular front-end project from version 6.3.1 to Angular 18.2.8.
- I updated all dependencies, including Bootstrap, Toast, Firebase, RXJS, NG-Loading, NGX-Perfect-Scroll, ESLint, among others.
- I updated functions, CSS styles, error handling, deprecated routes, and imports.
- I conducted manual comparative tests with the old system in each of the modules to ensure that each module is visually the same and functionally perfect.

Backend Developer

FindUp | may 2024 - july 2024

location: Peru Lima

- I developed an exportable submodule in Nestjs for the payment gateway of a travel agency, implementing this gateway with the VirtualPos service provider.
- I worked on the implementation and importation of this submodule into the main project, which was built with NestJS and MongoDB.
- Additionally, I created various endpoints and webhooks to handle different plans, promotions, and subscriptions for the agency's clients.
- I worked on migrating old users to the company's new subscription system at FindUp from May 2024 to July 2024 in Lima, Peru.

Full-stack Developer

Nefrólogo Pediatra Dra. Kathery | march 2024 - march 2024

location: Venezuela Táchira

- I worked on developing an informational website using ReactJs and TailwindCss to display the locations and office hours of Pediatric Nephrologist Dr. Kathery in Táchira, Venezuela.
- I also implemented Google Analytics on the site to track page visits and capture user-generated events.
- Finally, I deployed the website for Nefrólogo Pediatra Dra. Kathery in March 2024.

- Tailwind: Experienced
- Material: Experienced
- Bootstrap: Experienced
- TDD: Qualified
- Api Rest: Experienced
- Web scraping: Experienced
- M. Scrum: Experienced
- NestJS: Qualified
- AWS: Qualified

Full-stack web developer

Bolsiyo SAS | May 2021 - February 2023

location: Colombia Bogotá

- Worked as a team meeting objectives and staying punctual and professional at all times.
- Worked both on Frontend (Angular 11) and Backend (Loopback 4)
- Performed web scraping for product information retrieval.
- Implemented the token for page security using JWT, JWE.
- Implemented the connection to S3 for uploading files from backend.
- Implemented push notifications from Backend and sending Whatsapp messages from Backend using Twilio services.
- Contributed to the development of various modules in Frontend and the development of various endpoints for the operation and development of Bolsiyo.

Full-stack developer

villartechnologies | January 2018 - January 2021

location: Venezuela Táchira san Cristóbal

- Worked as a team meeting objectives and staying punctual and professional at all times.
- Developed a system in Angular8 and Node.js that connects different providers for product sales.
- Contributed to the development of a page to create public events (ReactJS, Redux, Laravel) and a dropshipping page (PHP, html, css, jquery, S3, testing with Selenium y Wiremock, imap, smtp, ftp, bootstrap).
- Worked on the development of a Chrome extension to sell products on Ebay (html, javascript, css).
- Performed scraping on different websites (axios, cheerio, puppeteer) and testing with Selenium and Wiremock.
- Worked on WordPress for editing and filling pdfs invoices (JavaScript, html, css, php).
- Replicated 2 informative pages made in (Laravel) to Kirby CMS.
- developed a system in Angular8 for monitoring and controlling different security cameras for a residential area.

Full-stack web developer (independent)

location: Venezuela Táchira san Cristóbal

- Worked independently developing desktop applications in Java and web development in my free time.
